

Plaso Kusay

Software Engineer

I am passionate about creating user-facing applications and software solutions that are meaningful and easy to use. I value style and consistency and have great attention to detail. I am also a reliable team player who advocates collaboration and knowledge sharing.

WORK EXPERIENCE

OpenStar Technologies, Wellington, NZ

Software Engineer

November 2023 – Current

- Contributed to and maintained an in-house UI library using React and Storybook.
- Contributed to building and upgrading a control room application using React, GraphQL, and Rust.
- Designed, developed, and rolled out a full-stack budgeting application for internal use, using Next.js and PostgreSQL, with continuous upgrades and maintenance.
- Built the UI for levitation control using React.
- Upgraded the UI for R&D winding machines using React and Node.js.

Syrp Lab, Auckland, NZ

Flutter Developer

November 2022 – February 2023

- Created the UI of an internal QA mobile app using Flutter, based on existing designs for an internal Android app. In doing so: Supported the R&D Team in transitioning to a cross platform codebase.

SELECTED PROJECTS

Blundle

Wordle-style daily chess puzzle game made using React and TailwindCSS. Made as a fun and challenging web-game for my chess club and friends.

Sussed

Web-application and tool tailored for conducting SUS Questionnaires. Allows users to create and manage multiple surveys for different projects and campaigns. Made using Next.js, TailwindCSS, and PostgreSQL.
